

PROVISIONING TO CDC DEVICES

ABSTRACT OF THE DISCLOSURE

5 A method for delivering a non-MIDlet application to a device associated with a
connected device configuration (CDC) through an over the air (OTA) mobile information
device profile (MIDP) protocol is provided. The method initiates with prefixing an
identifier for the non-MIDlet application, wherein the identifier is configured to imply a
MIDlet application. The method includes requesting the non-MIDlet application and
10 determining a type of the non-MIDlet application. Then, the non-MIDlet application is
managed with an interface application associated with the type of the application. A
system and device configured to download a non-MIDlet application through a mobile
information device profile (MIDP) are provided.
